

# EMF Adapter for Home / Office

## An All-in-One Solution to Neutralize Electrostress

This plug-in product can clear and protect an entire home or office space from the harmful effects of EMF radiation. The EMF Adapter uses the building's electrical circuitry to send a corrective, harmonizing resonance signal through the wiring of the entire space. Just plug in one EMF Adapter to protect your entire home or office.

\$299.95

Product Details: Range: radiates a transformative field through the electrical circuitry of the entire space clearing all electronics plugged into the circuit

## Just plug it in and you're protected

You can use the EMF Adapter wherever you have a free socket. Because wiring between circuits is connected, you only need one EMF Adapter for each electric meter / circuit breaker. The plug clears the toxic effects to the source of the electric entering the building.

Eliminate the toxic effect of EMFs from the outside source. Send a corrective resonance through the wiring of the entire house.

The adapter harmonizes the electrical fields running through the circuitry, clearing and protecting you from the harmful EMF fields generated by anything plugged into the circuit. It even clears harmful EMFs generated by wireless devices, because the router is plugged in.

## Harmonize all the electrical fields running through the internal wiring and circuitry of your entire home or office.

You can use the SafeSpace Adapter anywhere you have a free socket. It affects everything plugged into the entire circuit. It even clears wireless devices (Wi-Fi) simply because the wireless router is plugged into the main circuit.

One SafeSpace EMF Adapter corrects all the circuits connected to the circuit breaker box. A corrective, harmonizing resonance runs through any appliance or electronics plugged into the effected wiring

You can use the SafeSpace EMF Adapter wherever you live, work or spend time, including your home or apartment, your office, your school or classroom, and a hotel room – anywhere you can plug it in.

## Proven Protection

Research shows the benefits of SafeSpace products such as the EMF Adaptor. For example, data have shown that electromagnetic radiation can have a harmful effect on DNA. Independent laboratory testing shows that SafeSpace technology not only can stop the damage, but it can actually improve DNA recovery:

*"The Safe Space technology more than completely reversed the damaging effects of EMF radiation on the DNA ... the conductivity values were enhanced above normal..."* **Glen Rein, Ph.D.,** Director of Quantum Biology Research Labs
