The 1.25-inch-long VitaPlex has a vibrationally imprinted circuit permanently sealed within the pendant and encoded with specific subtle energetic signals designed to keep your body balanced. The range of frequencies available within the VitaPlex enables it to interact with you and adapt its "broadcasting" frequencies to your changing needs and outside circumstances.

"Smart" balancing energy

Other devices on the market—pendants, magnets, gems and more—simply can't match the long-term balancing and harmonizing "smart" power of the VitaPlex, which can:

- Help to restore integrity to the body through the energy field
- Help cells to regenerate and function correctly
- Energize while promoting calmness and clarity
- Protect you from electromagnetic radiation
- Counter jet lag and ease travel.

The Vitaplex is permanently encoded with specific subtle energetic signals. These signals are designed to bridge imbalances in the body's energy system and release the body's energy flow. It supports the opening of a new circuit of life energy throughout the body-mind so clear communication channels between the subtle bodies and the physical are reestablished. The 18" silicone cord is non toxic lightweight and comfortable. IT is energetically neutral and will not pick up toxic energies.

Start to feel better immediately

As soon as you put on the VitaPlex, its encoded frequencies begin to interact with your unique energy field to balance and harmonize your body. It continues to adapt to your needs and keeps you protected from toxic fields that can compromise your health. For best results, you should use the VitaPlex daily.
